Technology Resources for Families

The 2016-2017 school year has begun with the children ready and willing to learn. We have acquired additional resources for students to use both in the classroom and at home.

Families can log in to these different sites to help students practice skills and also to enhance their learning. Please be sure to have students log in regularly at home to support their academic needs.

Go Math: Think Central- Go to <http://www-k6.thinkcentral.com/>

Mathletics- us.mathletics.com

Spellodrome- us.spellodrome.com

Raz-Kids- <https://www.raz-kids.com/> (Students in Grades K-5 only)

EngradePro- <https://engradepro.com/>

Think Central is the website for our mathematics program Go Math. There are resources to help with homework, play math games, or find extra math practice. Online student editions of their chapter books can be accessed as well as virtual manipulatives and video tutorials.

Mathletics is designed to provide students with an engaging and safe learning experience. Targeted and adaptive content with structured support, plus gaming and rewards are aligned to the Common Core.

Spellodrome encourages independent learning and the development of critical spelling awareness.

Raz-Kids provides comprehensive leveled reading resources for students. Students access their leveled text through an interactive learning portal designed to keep them motivated and engaged.

EngradePro is an online gradebook for families to check the progress of students.

PLEASE BE SURE TO CONTACT THE TEACHER FOR USERNAMES AND PASSWORDS.
